

Why don't you think infection disease measures?

Stemmed from the Coronavirus epidemic, you are forced to measure against infection disease in not only medical and health care site but also every field; however, it is hard to obtain the prevention equipment in limited space and budget.....

We ALP hereby suggest a solution.

Autoclave

(steam sterilizer)

for full-scale medical

A small-footprint ALP autoclave can be used various sites in which invisible virus and bacteria should be killed.

Merely 1.0m² foot print with low installation cost!

Nowadays, under the Coronavirus epidemic, a sterilization is **needed** at **not only medical site**, but also various sites!
